GTO

## *Stainless Steel Finishing*

The whole side of the boat is finished with stainless steel profile, this guarantees more resistance and best finish.

***Fibrafort***  
***255***  
***GTO***

## *Gel Coat Painting*

One of the great differentials is the gel coat.

A type of resin that, after application, results in a smooth, shiny and defined color finish, which acts as both coating and protection. Unlike common paints, it forms several coats, so it can be easily sanded and polished and prevents fading.

***Fibrafort***  
***255***  
***GTO***

## *Anti- Corrosion*

All parts in stainless steel receive a layer of rubber between the fiber and the finish.

This finish prevents corrosion of the stainless steel part in direct contact with salt water.

***FibraFort***  
***255***  
***GTO***

## *ABS Counter Piece*

Our upholstery is produced with the ABS counter-piece and covered with rubber profile.

This finish gives durability, because when the upholstery is removed for cleaning or for the use of the compartment, it guarantees that there will be no erasures or wear of the leather.

***Fibrafort***

***GTO***

# Step Vee

Step Vee is a unique geometry of Fibrafort Boats. This geometry helps to reduce glide time and consequently fuel consumption.

*Items*

*Fibrafort*  
*255*  
*GTO*

## ***Blower (standard)***

Fibrafort 255, even without national requirement, has standard blower, ensuring that engine gases are eliminated.

***Fibrafort  
255  
GTO***

## *Bilge Pump*

Fibrafort 255 has a bilge pump installed and as well as all the components installed in the bilge of the boat, it is internationally certified, following all safety standards.

***Fibrafort***  
***255***  
***GTO***

## *Remote Drive Extinguisher*

Another complement that guarantees safety in Fibrafort 255 is the remote drive extinguisher. If any sign of fire is verified, the extinguisher can be activated by the panel without the need to approach or open the engine.

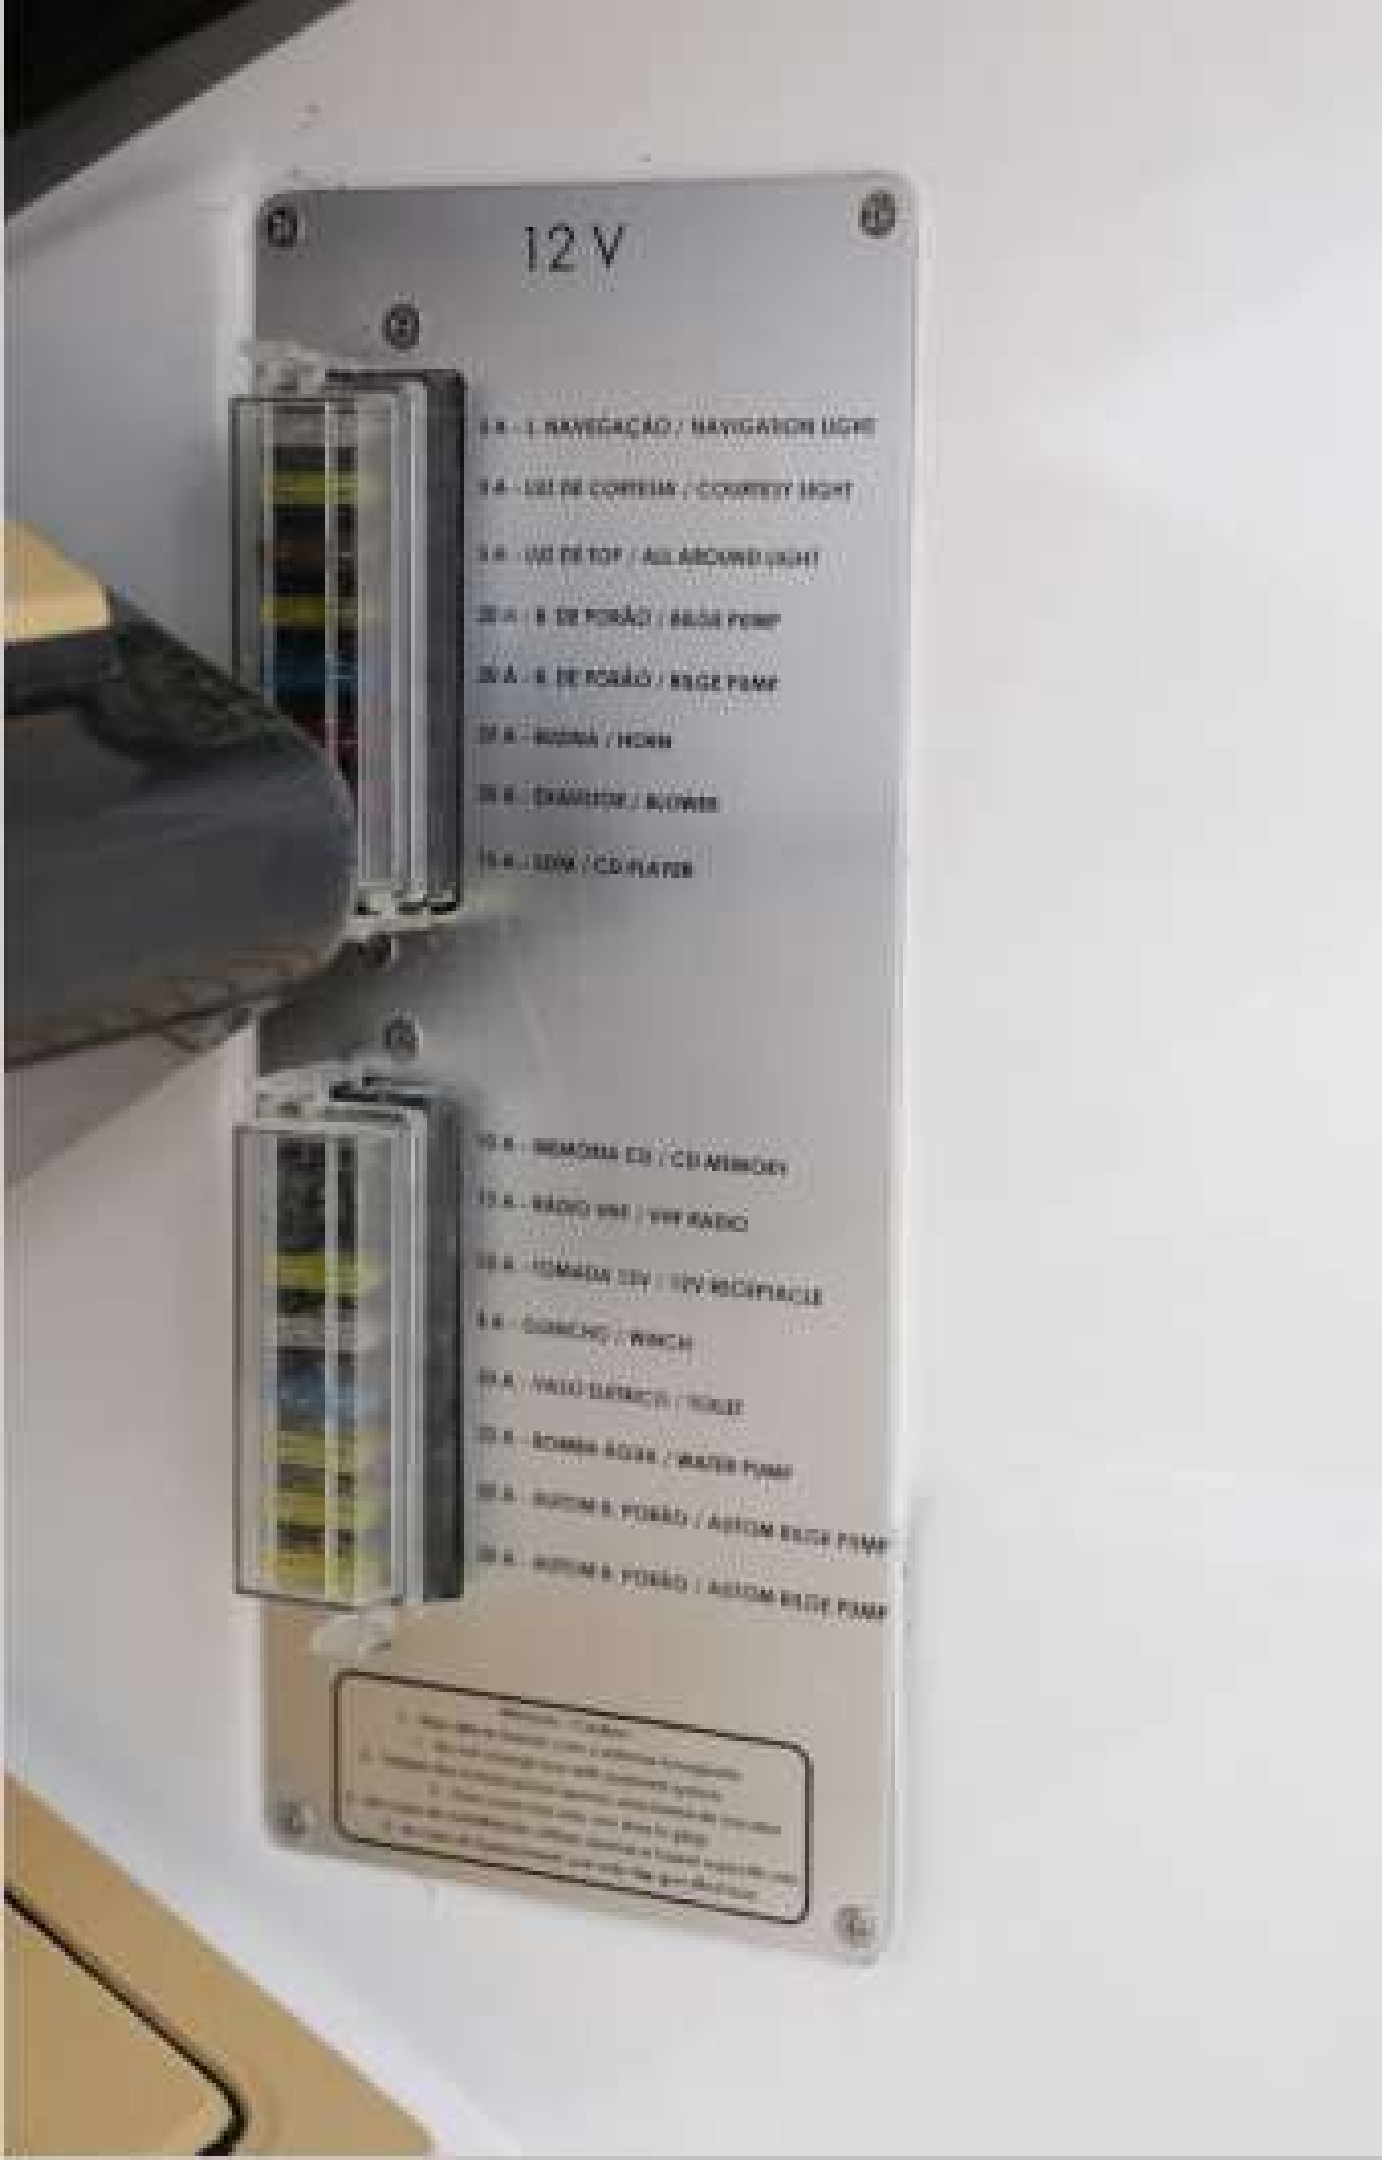

***Fibrafort***  
***255***  
***GTO***

## *Thermal and Acoustic Isolation*

Complementing other engine safety items, the thermal isolation blanket inhibits the passage of fire from the hold to the boat, in addition, it significantly reduces the passage of engine sound, providing greater comfort in navigation.

*Fibrafort*  
**255**  
*GTO*

## Electrical Components

All electrical components of Fibrafort 255 have international certification and high quality standards, so the consumer will have no problems even under inappropriate conditions.

**Fibrafort**  
**255**  
**GTO**

# General Switch

Fibrafort 255 has the general switch that is the system that turns off all electrical part of the boat when isn't browsing.

Motor / Engine

Serviço / House

## *Aluminum Fuel Tank*

Fibrafort 255 has an aluminum fuel tank that provides greater safety and prevents accidents.

***Fibrafort***  
**255**  
***GTO***

# *Internationally Certified Hoses*

Fibrafort 255 fuel tank hoses are internationally certified. In addition to being tested at the supplier, two tests are performed at the factory. One before joining and the other in assembly. These tests ensure there is no leakage.

**Fibrafort**  
**255**  
**GTO**

## Cockpit Fire Extinguisher

Fibrafort 255 has a portable extinguisher in the cockpit, generating more security in case of unexpected situations.
