Fibrafort **242** *GTO*

The Fibrafort 242 GTO expresses every concept of modernity, sportiness and sophistication that only a great boat can provide.

Besides the center engine, it has a chaise, ample bow space, the possibility of stainless steel tower and platform space, everything to inspire interactivity and family fun.

*Sport lines,
modern design and
outstanding finishing.*

Stainless Steel Finishing

The whole side of the boat is finished with stainless steel profile, this guarantees more resistance and best finish.

Fibrafort
242
GTO

242  **Focker**

Gel Coat Painting

One of the great differentials is the gel coat.

A type of resin that, after application, results in a smooth, shiny and defined color finish, which acts as both coating and protection. Unlike common paints, it forms several coats, so it can be easily sanded and polished and prevents fading.

Fibrafort
242
GTO

Anti-Corrosion

All parts in stainless steel receive a layer of rubber between the fiber and the finish.

This finish prevents corrosion of the stainless steel part in direct contact with salt water.

Fibrafort
242
GTO

ABS Counter Piece

Our upholstery is produced with the ABS counter-piece and covered with rubber profile.

This finish gives durability, because when the upholstery is removed for cleaning or for the use of the compartment, it guarantees that there will be no erasures or wear of the leather.

GTD

Step Vee

Step Vee is a unique geometry of Fibrafort Boats. This geometry helps to reduce glide time and consequently fuel consumption.

Fibrafort

*Safety and
Quality*

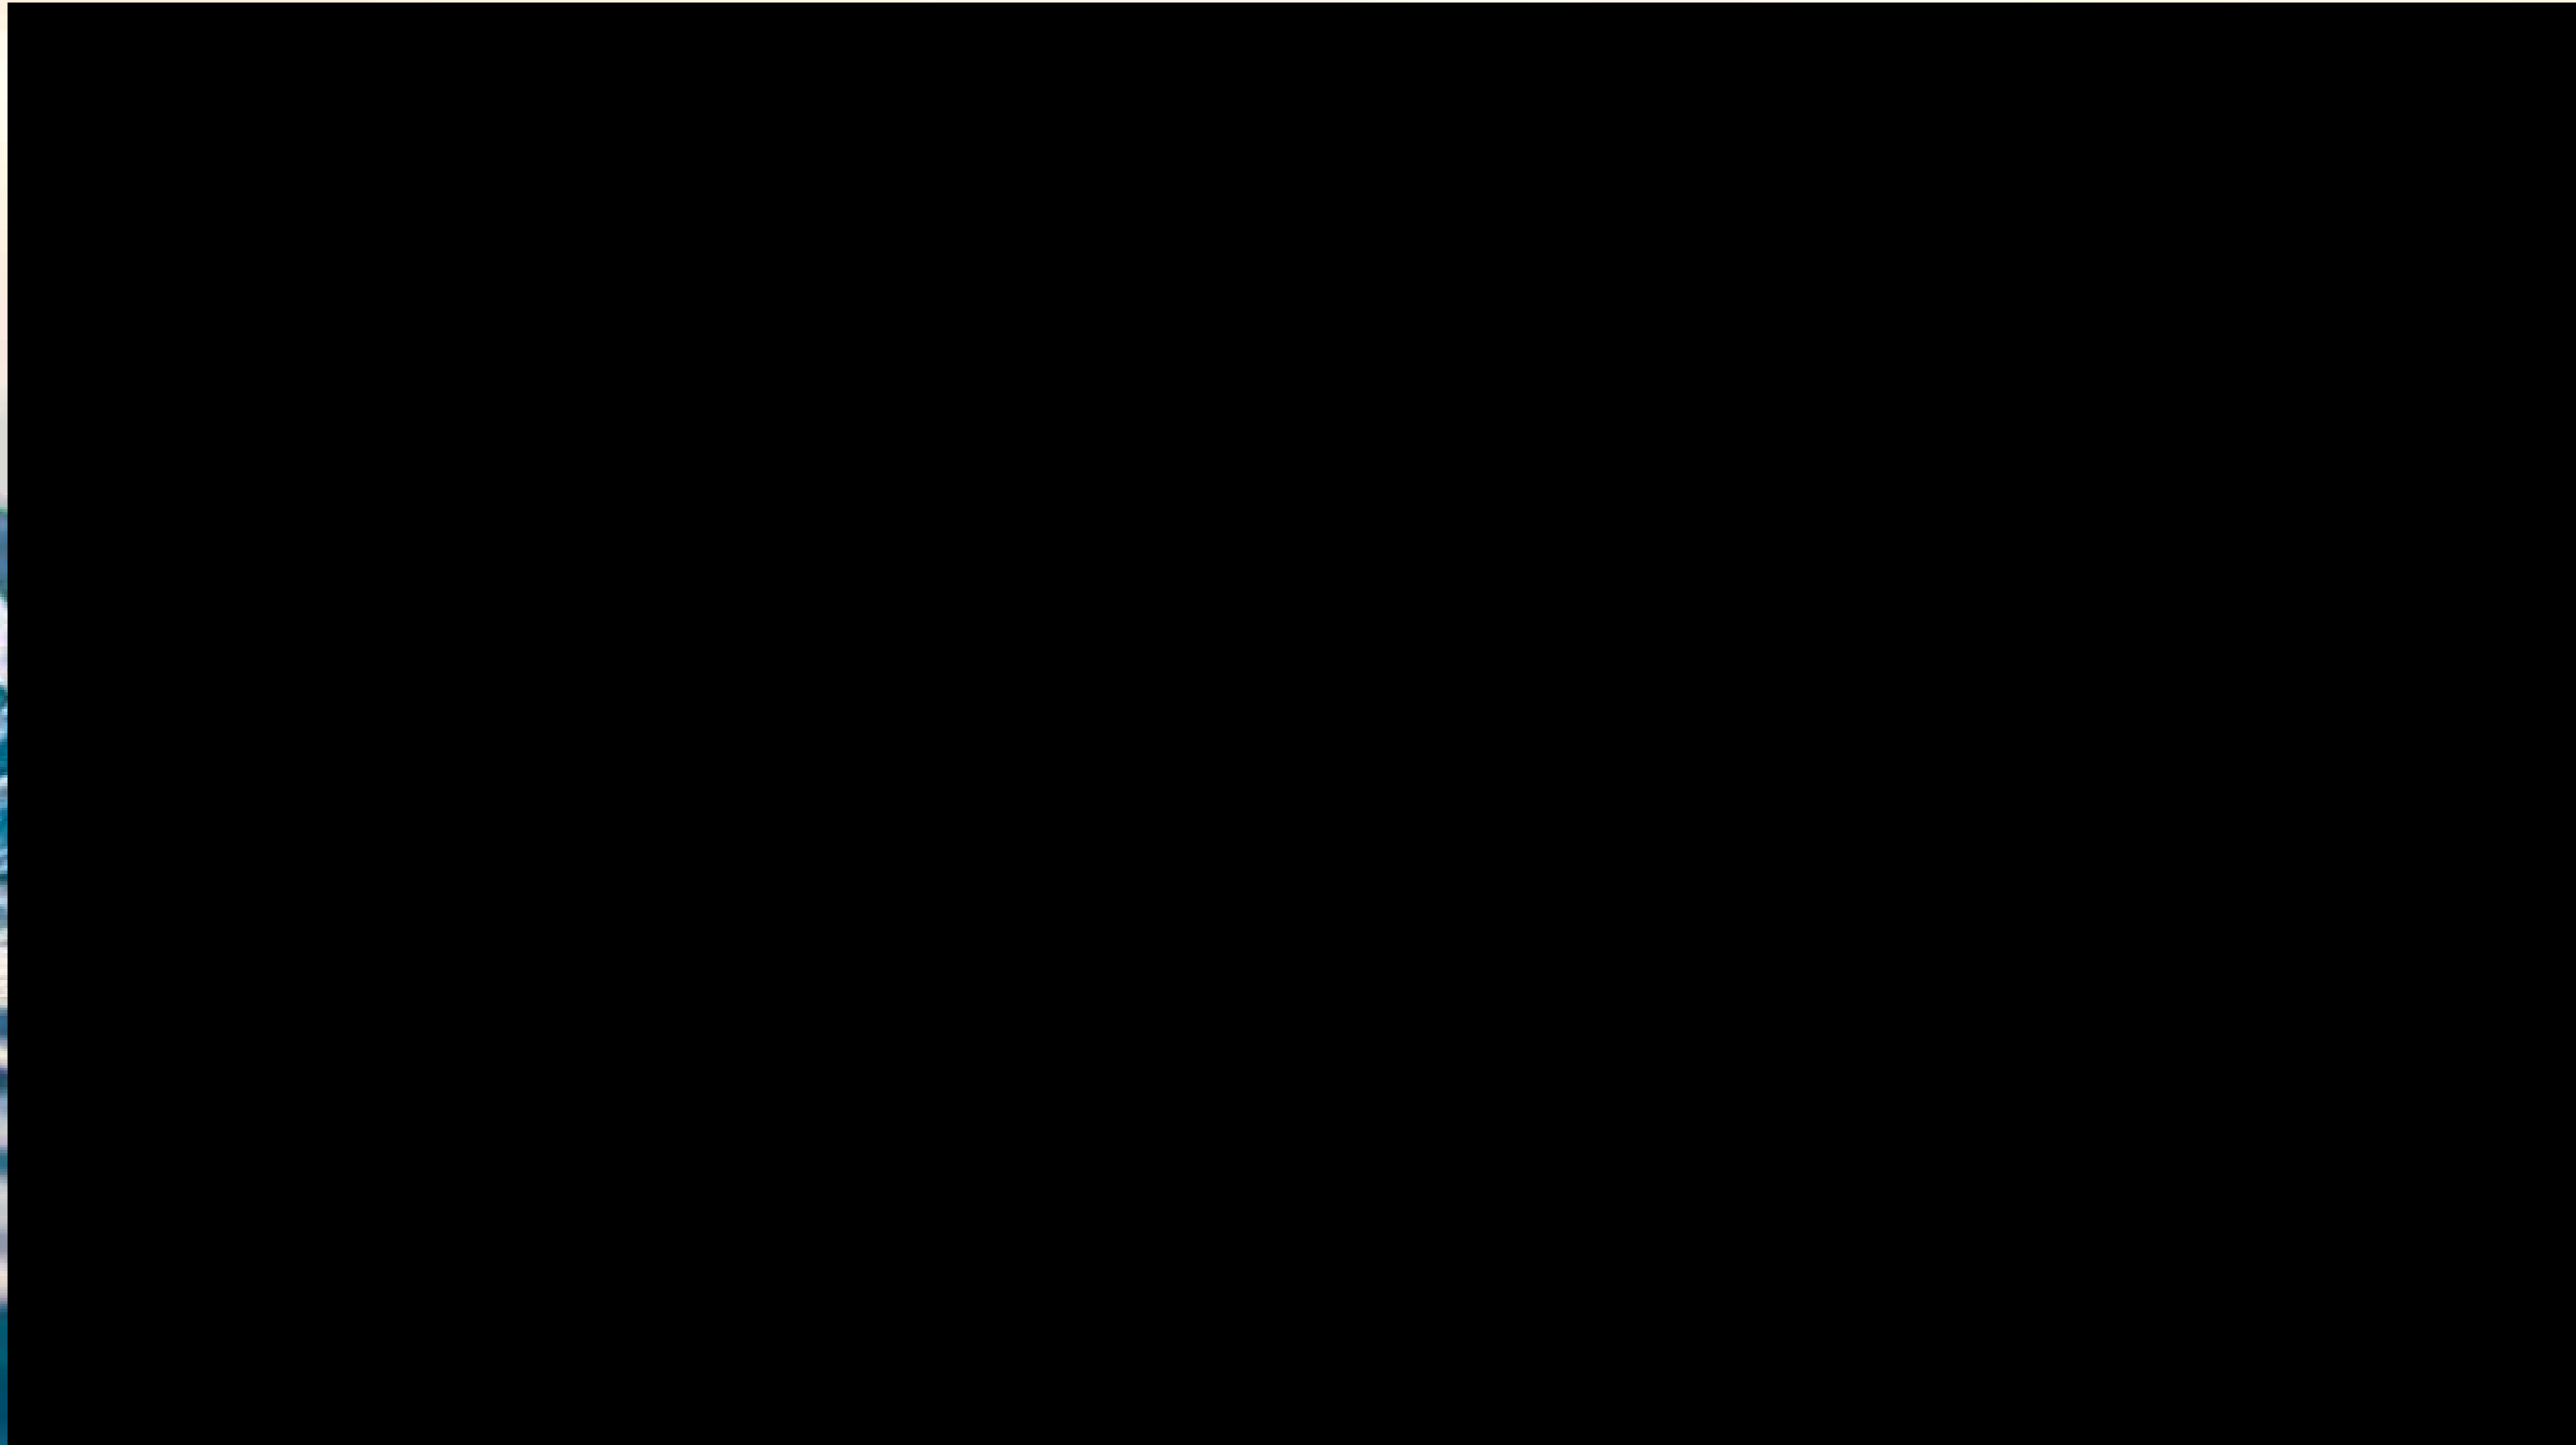

Fibrafort
24/2
GTO

The Fibrafort's boats are certified with national and international quality stamps, and that means ensuring quality and safety while sailing, check it out the video and understand why:

Safety

items

Fibrafort
2412
GTO

Blower (standard)

The Fibrafort 242 even without national requirement, has blower as standard, ensuring that the engine gases are eliminated.

Fibrafort
242
GTO

Bilge Pump

The Fibrafort 242 has a bilge pump installed and as well as all the components installed in the bilge of the boat, is internationally certified, following all safety standards.

Fibrafort
242
GTO

Remote Drive Extinguisher

Another complement that guarantees security in Fibrafort 242 is the remote-driven extinguisher. If any type of fire is verified, the extinguisher can be driven by the panel without the need to approach or open the engine.

Fibrafort
242
GTO

Electrical components and general switch

All electrical components of Fibrafort 242 have international certification and high quality standards, so the consumer will have no problems even under inappropriate conditions. Besides having the general key that is the system that turns off all electrical part of the boat when not sailing.

GTO

Internationally Certified Hoses

Fibrafort 242 fuel tank hoses are internationally certified. In addition to being tested at the supplier, two tests are performed at the factory. One before joining and the other in assembly. These tests ensure that there is no leakage.
